PROFESSIONAL SUMMARY

AI Engineer and Data Pipeline Engineer specializing in building **scalable, production-grade LLM applications** and automated data ecosystems. Expert in orchestrating complex data pipelines, designing **Retrieval-Augmented Generation (RAG) architectures**, and implementing automated evaluation frameworks to ensure high-performance, faithful AI outputs.

TECHNICAL SKILLS

Languages:	Python (Advanced), SQL, C++	AI & LLM:	LangChain, LlamaIndex, HuggingFace, PyTorch, Pydantic, RAGAS
Data Engineering:	Apache Airflow, dbt, Apache Spark, Kafka, PostgreSQL	Data Warehouse:	Snowflake, BigQuery, ChromaDB, Pinecone, Weaviate
DevOps & Tools:	Docker, Git, FastAPI, Jupyter, MLflow		

CORE COMPETENCIES

Retrieval-Augmented Generation (RAG)

LLM Evaluation & Benchmarking

Data Pipeline Orchestration (ETL/ELT)

Cloud Data Warehousing

Predictive Modeling & Automation

FEATURED PROJECTS

RAG System Development & Evaluation

Python, LangChain, Vector DBs, RAGAS, FastAPI

- Designed and implemented a robust RAG architecture utilizing LangChain and specialized Vector Databases (ChromaDB/Pinecone) for scalable semantic search.
- Engineered rigorous performance evaluations utilizing the RAGAS framework; optimized retrieval precision, context relevance, and answer faithfulness to prevent hallucinations.

LLM Benchmarking & Evaluation Pipeline

Python, HuggingFace, OpenAI API, BERTScore, ROUGE

- Developed a fully automated evaluation framework to assess LLM performance across diverse enterprise use cases.
- Built comprehensive testing suites to measure and mitigate hallucination rates, toxicity, and generation latency; implemented comparative analysis for prompt engineering iteration.

Automated Data Pipeline & BI Architecture

SQL, PostgreSQL, dbt, Apache Airflow, Power BI

- Built end-to-end data pipelines to ingest, clean, and process complex datasets for high-level business intelligence.
- Leveraged SQL and workflow orchestration tools (Airflow, dbt) to fully automate ETL workflows; ensured strict data integrity feeding verified analytics into Power BI dashboards.

EDUCATION

Government College University (GCU) — Lahore

2022 – 2026

BSc. Computer Science (Hons.)

★ Allama Iqbal Scholarship — Full-ride scholarship for top-performing Sri Lankan students
